

# Allianz Plan Vie

**My future projects, today I choose to plan them with Allianz Plan Vie.**

Add value to your savings, finance a building project, anticipate the cost of your children's education, prepare your retirement and organize the transfer of your assets... There are many different savings, foresight and transmission goals that correspond to life insurance in a favorable, legal and tax framework.

This policy allows you to progressively build equity at your own rhythm, with payments starting from 100€ per month.

- **You can have the choice**

With Allianz Plan Vie, you can:

- Make extra installments, with no limitation, starting from 450€,
- Change your regular installments at any time,
- Have your capital in the case of need by making a total or partial repurchase (after 2 years or after investing 4 500€),
- Choose your beneficiary in the case of death,
- Benefit from no inheritance tax or solicitors fees.

- **I want to choose the management style which corresponds to my needs**

Allianz Plan Vie is a multisupport contract in which the money are invested exclusively on the stock exchange.

Four different supports are proposed, adapted to four different investments profiles, from a defensive risk to a more significant risk level:

- **Allianz Multi Harmonie:** a low performance outlook limiting the risk of equity loss
- **Allianz Multi Equilibre:** a moderate risk take with perspective of medium-term performance
- **Allianz Multi Dynamisme:** you prefer a long term performance but accept a significant capital loss
- **Allianz Multi Opportunités:** in the perspective of a long term performances but accept a big risk of losing significant amount of your investment.

These supports are fully managed by Allianz Global Investors, which is one of the world leaders in asset management.

- **Foresight guarantees**

Unfortunately accidents and illness are hazards in our day to day lives. It is important to be prepared in order to finalize your projects.

When you will take out the policy, the guarantee of accidental death is offered. This means that should you pass away due to an accident before you turn 86, your beneficiary will receive an extra 50% of the amount that you have left to them (in the limit of 1 000 000€).

There are also 4 additional options that you can also take out to make sure that you are fully covered should the worst happen.
